and Bulgaria.

His recent interest to holography brings him to new
dimensions in his work.

2002 together with Ventzislav Sajinov and Stanislav Shurulinkov he
develops his work in art holography

Holography is just a new technical way how Jivkov expresses
his search in the new dimension of the traditional fine art. After him
holosculpture is the new form born out of scientific achievements
and art. This new form called holosculpture appears as synthesis of
different materials-stone, metal, wood, glass etc. The real material is
light, not only as a physical phenomena, but as a spiritual
experience.

Holography creates a new world of illusions, lost in our time.
